Issue Background:

FM Global provides a grading scale for identified risk areas and compares Exhibition Place facilities to other similar facilities. Not all risks identified by FM Global are violations of any Building / Fire Code / legislative violations, rather some of the noted items are above and beyond the minimum standard / code requirements, but are identified as risk reduction practices.

Comments:

FM Global works with Exhibition Place staff to identify possible risks in the buildings in order to review and determine severity of risk and whether the risk is acceptable or not acceptable. FM Global provides risk management identification and prevention of the potential hazards along with proven loss control solutions that deliver a means to mitigate the risk.
