Event Services

Much of the month of August was spent in preparation for the annual Canadian National Exhibition.

We had an extremely short lead up to the 2014 Celebration, an event for the opening of the new Aga Khan Museum and Cultural Centre in Toronto. A new Fire Exiting plan was developed to accommodate the increased attendance. Exhibition Place Staff from all departments pulled

Stewart (AC)

together to ensure the entire event took place very smoothly. The client was extremely appreciative of our efforts.

Another new event, The Baby Show, was also very impressed with our delivery of services and plan to book again during 2015. We were able to combine move out costs for this and the Business Franchise and Investment Show to enable both to save some costs.

Everything to Do with Sex returned successfully after a few years absence while the Catwalk 2 Closet Sample Clearance Sale was a new high end fashion event with low priced merchandise. The client hopes to book again in a larger space.

We also hosted a City of Toronto Election Polling Station.

Exhibitor Services

The order desk serviced six events for the months of August and September. During September, Exhibitor services opened a central order desk location. It is located across from the concierge desk beside Salon 106. This location is next to the Exhibitor support centre and will be close to the registration, ticket and show offices. During this month we serviced four events with positive feedback from exhibitors and show management.

The Exhibitor order desk also serviced 11 events during October. Staff were also busy in preparation for the events in November.

Allstream Centre

We had 9 events during September, including the returning Toronto East General Hospital Gala which was a huge success. Mitsubishi was back for their 4th year, along with the Patent Agent Exams. Deloitte also returned with their ERS 2014 conference for 5 days much like the past few events here. We also hosted a wedding for 400 people. WBE Canada and Market America are two new events this year.

October was a very busy month and we are preparing for the College of Physicians & Surgeons on Oct. 22-25. It includes a convocation on October 25th, for which we are expecting approximately 1,200 guests per day. University Health Network was a large 3 day event.

Returning clients included IBM, Microsoft, which had 3 separate meetings, AIIM, Ontario Craft Brewers, and Ophea for a 2 day conference. We will be hosting new clients near the end of October. These include the Canadian Construction Association and the Canadian Wood Council. Yad Vashem will be returning with their True Hero's Tribute Gala on Oct. 30th. There are approx. 22 events in October.

Parking

Parking saw high activity for the months of August, September and October. August began with three days of FIFA games and five days of sold out concerts at Molson Amphitheatre, prior to the start of the 2014 Canadian National Exhibition. Increased parking activity from the concerts and FIFA games made up for the parking loss from other events budgeted. Parking revenue for September was up mainly from the 2014 Celebration and Just for Laughs at QET. To date parking revenue is over budget for October due to Direct Energy Centre new business not budgeted, including Eid Prayer, Catwalk 2 Closet and Ontario College.

IT/Telecommunications

IT telecom successfully deployed a new PCI (Payment Card Industry) secured network for the CNE gates system. This system was implemented across the campus and connected all gate locations together through a secure PCI compatible firewall.

IT has been virtualizing hardware servers using VMWare ESXI (Vsphere) software. This project has allowed for the reduction of physical server hardware as well as providing additional potential redundancy of the technical assists. The IT department plans to continue the virtualization of servers in order to provide additional backup capability for other essential server systems.

IT/Telecom has significantly expanded the data storage capability for email and file storage. This expansion capability was achieved by the reallocation of disk space that was previously used for data backup, which is now integrated into a continuous virtualized backup process using Appasure software from DELL.

The Toronto Fashion Incubator became the newest permanent tenant to participate in the data/telecom infrastructure sharing system. The TFI previously had used a third party data provider that was unable to provide them with sufficient bandwidth to satisfy their needs. The IT group is preparing to deploy the new digital signage system. This software/hardware combination should provide clients in the DEC with additional information and way finding information.

IT/Telecom has begun the preparation of a new permanent security badge/photo preparation centre. This new location in the DEC shall provide a more centralized location for preparation of security badges for staff and clients.
