

Working together to protect the
environment for future generations

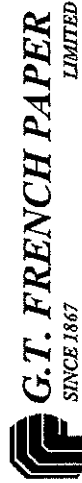

Exhibition Place

This award is presented to the Board of Governors of Exhibition Place for its commitment to the environment. Exhibition Place uses Cascades' North River™ brand products that are certified Processed Chlorine Free, Green Seal and Ecologo, and made of 100% recycled fibre with up to 100% post-consumer material.

These products participate in the preservation of 30 million trees per year, and 80% less water than the industry average is used in their production.

Exhibition Place, in 2006, intends to save 421 trees and 17,866 lbs. of CO₂ gas.
